This document also amends this operations plan by adding the following language:

***Electronic Monitoring Program in FY 2018***

*Vessel Operations*

*Sector vessels may use electronic monitoring (EM) systems (i.e. cameras, gear sensors, video recording equipment) in lieu of human at-sea monitors (ASM) to meet federal ASM requirements for fishing year 2018. These vessels may be authorized to use EM only under a valid Exempted Fishing Permit (EFP) issued by NOAA Fisheries. Vessels fishing under the EFP must abide by all operational and reporting requirements and conditions outlined in the EFP and the vessel's Vessel Monitoring Plan.*

*Selection of Coverage*

*Sector vessels using EM are required to declare their intent to take a sector trip using the Pre-Trip Notification System (PTNS), consistent with standard notification protocols. PTNS selection and notification procedures for Northeast Fishery Observer Program (NEFOP) coverage under EM remains the same. Vessels fishing under this EFP are not exempt from the requirement to carry a NEFOP observer when selected for coverage.*

*Service Provider*

*The sector has selected the following Electronic Monitoring Service Provider to provide EM services to participating vessels for FY 2018.*
